Dear Sir / Madam,

Subject: Intimation under Regulation 30 of SEBI (LODR) Regulations, 2015 – Newspaper coverage on strategic investor **LORD'S MARK INDUSTRIES LIMITED**

Pursuant to Regulation 30 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, we wish to inform that a news article has been published in leading newspapers dated 09th October 2025, titled "*Lords Mark Industries earns US FDA nod, boosting India's global healthcare footprint.*"

The article highlights that Lords Mark Industries Ltd., the strategic investor of Lords Mark India Limited, has received US FDA registration for its wide range of surgical consumables, orthopedic supports, and hygiene products.

This significant certification reinforces India's manufacturing credibility in the global healthcare segment and marks an important milestone in Lords Mark Industries' global expansion strategy, strengthening India's position in the international medical supply chain.

As stakeholders are already aware, the Hon'ble National Company Law Tribunal, Mumbai Bench, vide its order dated **28th July 2025**, has approved the **Final Base Resolution Plan** submitted by the Company (as Corporate Debtor) along with **Lord's Mark Industries Limited** (Strategic Investor) under Section 54K(15) of the Insolvency and Bankruptcy Code, 2016.

Further, the **Registrar of Companies** has approved **Form INC-28** for the amalgamation of '**Lords Mark Industries Limited**' with '**Lords Mark India Limited**' (formerly *Kratos Energy & Infrastructure Limited*).

Lords mark industries earns US FDA nod, boosting India's global healthcare footprint

TSN/Mumbai

In a major step that reinforces India's manufacturing credibility in global healthcare, Lords Mark Industries Ltd. has secured US FDA registration for its wide range of surgical consumables, orthopedic supports, and hygiene products. The certification marks a significant milestone in the company's global expansion strategy and strengthens India's standing in the international medical supply chain.

The US FDA registration is recognized as the gold standard for quality, safety, and compliance, and opens access to highly regulated markets such as the United States, the European Union, and the Middle East. For Indian manufacturers, it represents an entry point into global healthcare networks. For Lords Mark Industries, it signals a transformative phase in export-led growth and product diversification, aligning with

India's larger goal of becoming a global hub for healthcare manufacturing.

The FDA-approved product line includes an extensive portfolio across multiple categories. In medical consumables, the company manufactures Cotton Crepe Bandages, Elastic Adhesive Bandages, Cannula Fixators, and Disinfectant Wet Wipes. Its orthopedic and rehabilitation products range from abdominal and rib belts to lumbar supports, cervical collars, Taylor's braces, arm slings, shoulder immobiliz-

ers, cockup splints, and knee immobilizers. Complementing these is the Lord's Joy range, which features baby wipes, bed bath wipes, and refreshing wipes designed for everyday hygiene needs.

Central to this achievement is Lords Mark's advanced surgical manufacturing facility located in Dadra & Nagar Haveli. The plant houses five integrated divisions and employs more than 100 skilled professionals. Equipped with five loom machines, TFO and cheese

winders, warping and dyeing units, 38 stitching machines, and a fully automated elastic adhesive coater, the unit exemplifies precision-driven production.

The facility follows the 5S manufacturing discipline for organization and efficiency, supported by an integrated Quality Control and Quality Assurance system with multiple checkpoints for inspection, testing, and validation. It is compliant with ISO 13485:2016, WHO-GMP, CDSCO, cGMP, GLP, Indian FDA, and now US FDA standards, ensuring that every product meets international benchmarks for safety and reliability.

Beyond production, Lords Mark has digitized its logistics operations with real-time tracking and predictive analytics for route optimization and packaging traceability. This digital logistics framework reduces lead times, minimizes handling costs, and ensures accurate, on-time global delivery.
